Testimonial for Karen Marsolek:

*"I first learned of Karen Marsolek through word of mouth advertising from a colleague that recently had exposure to her dynamic, empathetic presentation style. What a great recommendation it turned out to be! We asked Karen to develop a "retreat-style" programming series for a recent gathering of quality coordinators from Montana's Critical Access Hospitals that would leave the audience energized and ready to go back to their difficult work with renewed spirit. She delivered! Karen started the event with a fun, "get comfortable" session that involved games and prizes and set the stage for a relaxed, collegial atmosphere for the rest of our conference. She developed a sense of community among the participants during her keynote session and continued that theme through to the closing session which left the crowd motivated and feeling very good about what they do. A delight to work with, we would ask Karen back anytime!"*
